Management's Discussion and Analysis

Trends in the Real Estate Industry

In the real estate industry, the residential market saw sales prices continue to increase while supply volume declined due to construction costs remaining high and intensified competition for the land acquisition, and there continued to be a trend of polarization in salability based on the levels of the convenience of the regions and the properties themselves.

Condominium supply in the Tokyo region increased by 3.4% year-on-year to 37,132 units in the calendar year 2018. The contract number for the first month on newly marketed condominium units in 2018 decreased by 6.0 percentage points year-on-year to 62.1%.

In the office market, many deals were executed in connection with office expansion such as relocations for more space, opening of branch offices and the expansion of floor space within buildings,

and declining vacancy rates and increasing rent revenue continued nationwide.

The office building vacancy rate in the five wards of central Tokyo declined by 1.02 percentage points as of March 31, 2019, improving to 1.78%. Average rent levels in the five wards of central Tokyo as of March 31, 2019 increased by ¥1,435 per tsubo to ¥21,134 compared to March 31, 2018.

In the real estate investment market, the total asset size of J-REITs was steadily expanded thanks to the increase of property acquisition accompanied by new listings and public offerings, and the appraisal of J-REITs as stable and secure investments not susceptible to the impact of international affairs was enhanced because of the favorable domestic real estate market conditions.

Expected yields on A-class office buildings in the Marunouchi/Otemachi area remained at the same level year-on-year of 3.5% as of March 31, 2019.

Analysis of Operating Results

In this business environment, the Nomura Real Estate Group (the "Group") posted the following consolidated performance for the fiscal year under review: Operating revenue of ¥668,510 million, which represents an increase of 7.2% year on year; operating profit of ¥79,162 million, an increase of 3.3%; ordinary profit of ¥69,323 million, an increase of 1.9%; and profit attributable to owners of parent of ¥45,873 million, a decrease of 0.3%.

This year our ROA was 4.7% and ROE was 8.9%.

Operating Results by Segment

An overview of segment achievements is given below:

Operating revenue for each business unit includes internal sales and transfer amount among business units. Due to the rounding of fractions, total figures may not match.

From the fiscal year under review, Nomura Real Estate Reform Co., Ltd., which had been classified under the Residential Development Business Unit, was transferred to the Property & Facility Management Business Unit. As of August 1, 2018, Nomura Real Estate Reform Co., Ltd. was merged with Nomura Real Estate Partners Co., Ltd. being the surviving company in an absorption-type merger.

Changes in Operating Income and ROA*

* ROA = (Operating profit + Non-operating profit) / Average assets during the fiscal year

Residential Development Business Unit

Operating revenue in the Residential Development Business Unit totaled ¥362,761 million, which represents an increase of 2.1% year on year, and operating profit totaled ¥23,180 million, a decrease of 5.5% year on year, resulting in an increase in operating revenue and a decrease in operating profit compared with the previous fiscal year.

This was mainly due to a decrease in gross profit in other business, excluding residential development, owing to a decline in fees from JV projects, while there is no change in gross profit margin ratio for housing sales and there was an increase in the number of housing sales and a rise in unit sales prices.

In regard to housing sales, 5,890 units were recorded as sales (an increase of 25 units year on year), including PROUD CITY Etchujima (Koto-ku, Tokyo), PROUD TOWER Higashi Ikebukuro (Toshima-ku, Tokyo) for condominiums, and PROUD SEASON Senri Maruyamacho (Suita-shi, Osaka) for detached housing. As of the end of the fiscal year under review, the number of completed housing inventories totaled 276 units (a decrease of 182 units compared with the end of the previous fiscal year) and the number of contracted but not recorded housing units totaled 2,996 units (an increase of 165 units compared with the end of the previous fiscal year).

The Company has actively engaged in development projects in regional core cities in Japan and overseas, such as joining redevelopment projects in Mishima Station-front and Utsunomiya Station-front in Japan and expanding its business in Bangkok, Thailand.

Leasing Business Unit

Operating revenue in the Leasing Business Unit totaled ¥167,628 million, which represents an increase of 24.2% year on year, and operating profit totaled ¥38,858 million, an increase of 10.3%, resulting in increases in both operating revenue and operating profit compared with the previous fiscal year.

This was mainly due to an increase in leasing revenue in leasing business and revenues of property sales in property development business.

Construction of facilities including the PMO Akihabara North office building (Taito-ku, Tokyo), the PMO Higashi-Shinbashi office building (Minato-ku, Tokyo), and the GEMS Namba retail facility (Chuo-ku, Osaka-shi, Osaka) have been completed.

In logistics facilities, the Company finished constructing Landport Ome I (Ome-shi, Tokyo), a large-scale, high-functional "Category Multi-type" facility, and started its operation. "Category Multi-type" is a new concept that specifies industrial sectors to which the tenants belong and adds those sectors' specific functions as the facility's standard functions.

In November 2018, the Company opened NOHGA HOTEL UENO (Taito-ku, Tokyo), as the first project of the Group-operated hotel brand. In March 2019, the Group acquired all of the shares of Ryubundo Co., Ltd., which owns properties such as Hotel Niwa Tokyo, and its wholly-owned subsidiary UHM Co., Ltd., a hotel operating company.

Investment Management Business Unit

Operating revenue in the Investment Management Business Unit totaled ¥9,641 million, which represents an increase of 2.8% year on year, and operating profit totaled ¥5,943 million, an increase of 0.5%, resulting in increases in both operating revenue and operating profit compared with the previous fiscal year.

In the core REIT business, Nomura Real Estate Master Fund, Inc. and Nomura Real Estate Private REIT, Inc. acquired a total of 21 properties for ¥75,499 million (transaction amount) from Nomura Real Estate Development Co., Ltd. in accordance with the sponsor pipeline in the leasing value chain.

Moreover, the Company acquired 75% of the shares of Lothbury Investment Management Group Limited, a British real estate management company, in November 2018. As a result, assets under management have steadily expanded and totaled ¥1,669,476 million at the end of the fiscal year under review, which represents an increase of ¥383,573 million year on year.

Property Brokerage & CRE Business Unit

Operating revenue in the Property Brokerage & CRE* Business Unit totaled ¥37,298 million, which represents an increase of 4.5% year on year, operating profit totaled ¥8,170 million, a decrease of 3.3%, resulting in an increase in operating revenue and a decrease in operating profit compared with the previous fiscal year.

This was mainly due to prior investments in human resources, stores and systems with looking ahead to future expansion in the business volume.

In the retail business, we opened the following new branches: Nagoya branch (Naka-ku, Nagoya-shi, Aichi) in April 2018, Toranomom Center (Minato-ku, Tokyo) in May 2018, and Yokohama motomachi Center (Naka-ku, Yokohama-shi, Kanagawa) in October 2018, and the total number of branch stores is 81.

In January 2019, the Group entered a capital alliance agreement with Tokio Property Services Pte Ltd., a real estate agency in Singapore, to strengthen its ability to cope with investment needs for real estate from Southeast Asia, where further expansion of the needs is expected.

*CRE: Corporate Real Estate

Property & Facility Management Business Unit

Operating revenue in the Property & Facility Management Business Unit totaled ¥107,802 million, which represents an increase of 3.1% year on year, and operating profit totaled ¥8,067 million, an increase of 14.0%, resulting in increases in both revenue and operating profit compared with the previous fiscal year.

This was mainly due to an increase in revenue of property and facility management with the increase in the number of properties under management and an increase in the number of members in the fitness club business.

In the fitness club business, we opened MEGALOS HIBIYA Chanter (Chiyoda-ku, Tokyo) in September 2018 and MEGALOS Reflet SHINSAIBASHI (Chuo-ku, Osaka-shi, Osaka) as a facility for women only in November 2018 in accordance with the rollout strategy to meet the regional needs and targets.

In addition, as of the end of the fiscal year under review, the number of buildings under management was 732 buildings (up 9 from the end of the previous fiscal year), and the number of condominiums under management was 177,582 units (up 3,877).

Other Business Unit

Operating revenue in the Other Business Unit totaled ¥94 million, which represents a decrease of 11.7% year on year, and operating loss totaled ¥43 million (operating loss in the previous fiscal year was ¥10 million).

Analysis of Financial Position

Assets

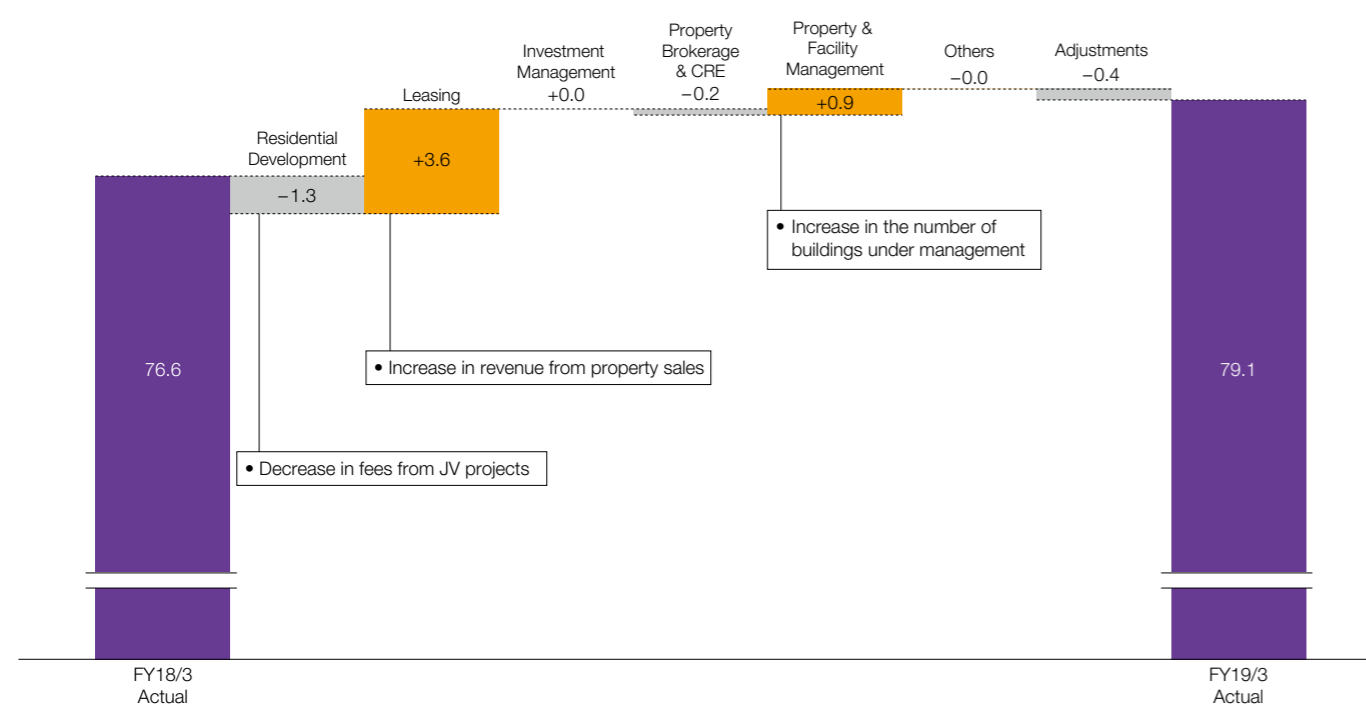

Total assets were ¥1,759,455 million, which represents an increase of ¥86,355 million compared to the end of the previous fiscal year. This was mainly due to increases in cash and deposits (increased by ¥29,003 million) and securities (increased by ¥28,000 million).

Liabilities

Total liabilities were ¥1,217,893 million, which represents an increase of ¥59,776 million compared to the end of the previous fiscal year. This was mainly due to increases in interest-bearing debt (increased by ¥36,200 million) and notes and accounts payable-trade (increased by ¥12,230 million).

Changes in Net Assets and Shareholders' Equity Ratios

Cash Flows

Cash Flows from Operating Activities

Net cash provided by (used in) operating activities was ¥89,964 million (a year-on-year increase of ¥68,465 million). This was mainly due to the payments of income taxes, while profit before income taxes totaled ¥65,407 million and inventories decreased.

Net Assets

Net assets were ¥541,562 million, which represents an increase of ¥26,579 million compared to the end of the previous fiscal year.

This was mainly due to the acquisition of treasury shares (decreased by ¥8,783 million) offset by an increase in retained earnings (increased by ¥32,271 million).

Cash Flows from Investing Activities

Net cash used in investing activities was ¥46,699 million (a year-on-year increase of ¥4,938 million). This was mainly due to the payment for the acquisition of subsidiary shares accompanying changes in the scope of consolidation and the purchase of property, plant and equipment and intangible assets.

Cash Flows from Financing Activities

Net cash provided by (used in) financing activities totaled ¥13,723 million (a year-on-year decrease of ¥30,063 million). This was mainly due to the procurement of funds by long-term loans payable, while there was the acquisition of treasury shares and payment of cash dividends.

Facilities Situation

In the fiscal year ended March 31, 2019, we invested a total amount of ¥19,776 million, including the acquisition of NOHGA HOTEL UENO (Taito-ku, Tokyo).

Basic Policy Concerning Profit Distribution and Dividends for the fiscal years ended March 31, 2019 and 2020

The Company's payout ratio is approximately 30%, in accordance with business performance, comprehensively considering the operating environment, capital investment plans, retained earnings, and other relevant factors for the fiscal year ended March 31, 2019. The Company intends to set the year-end dividend for the fiscal year ended March 31, 2019 at ¥37.5 per share as forecasted. Combined with the second quarter-end dividend, the annual dividend per share is ¥75.0.

As for the fiscal year ending March 31, 2020 in Phase 1 of the Mid- to Long-term Management Plan (from fiscal year ending March 31, 2020 to fiscal year ending March 31, 2022) formulated in April 2019, total return ratio is around 40% to 50%. In regard to the dividend for this fiscal year, the second quarter-end and year-end dividends will be ¥40.0 per share, and the annual dividend will be ¥80.0 per share.

Changes in Dividend Payments

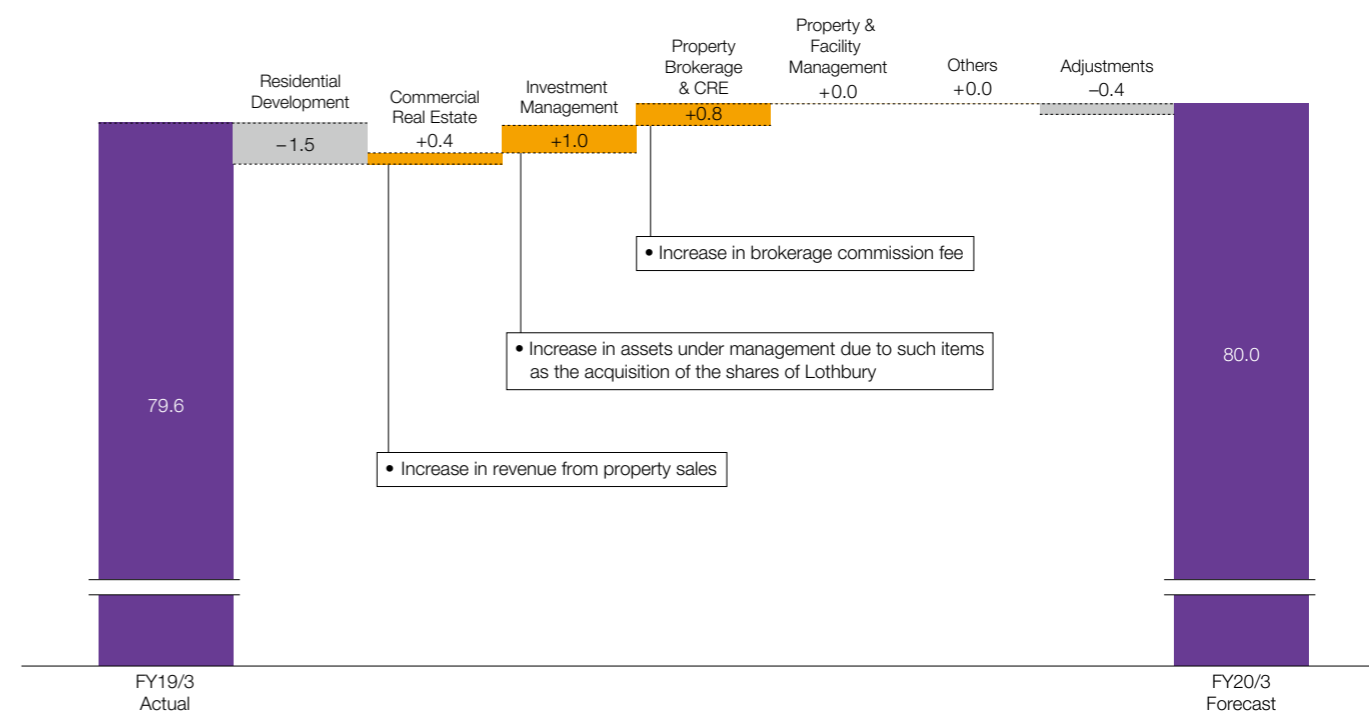

Consolidated Performance Outlook for the fiscal year ending March 31, 2020 (announced on April 25, 2019)

Key Factors of Changes by Segment from FY19/3 to FY20/3

(Billions of yen)

Risks Affecting the Business of Nomura Real Estate Group

We believe that the following matters related to the Group's business, accounting and other conditions could have a material impact on the decision-making of investors.

It should be noted that matters concerning the future in this document have been determined based on information available to the Group as of March 31, 2019.

(1) Risks resulting from deterioration of business environment

With regard to the Company's business environment, a domestic or overseas economic downturn, the planned consumption tax increase in October 2019, and a potential decrease in corporate earnings and a decline in personal consumption, or an increase in interest rates and an oversupply in the real estate market may occur. Thus, any such events may cause a decline in purchasing sentiment among customers of the Residential Development Business, the Property Brokerage & CRE Business, as well as a consequent fall in selling prices, an increase in inventories, and valuation losses on inventories.

As for the Leasing Business and the Investment Management Business, there could be a decline in office rent levels, an increase in vacancy rates, a fall in property prices or a drop in profit ratios and an associated valuation loss on assets owned by the Group. Additionally, declining REIT stock prices and weakening demand for investment funds may occur.

The Company has positioned M&A as an important growth strategy, and aims to increase its corporate value by implementing M&A that can be expected to generate synergies and utilizing the characteristics of the holding company system. However, in the event of changes in the business environment, the expected growth of the acquired company, or the synergy expected from the acquisition, may not be realized.

The events described above could have an adverse impact on the Group's business performance.

(2) Risks resulting from changes to real estate-related legislation or the tax systems

A number of laws and regulations in Japan and overseas apply to the various businesses of the Group, which will be subject to new regulations as it expands its operational scope in the future. For example, in Japan, the Group may face new obligations and expense burdens if the Building Standards Law, the Building Lots and Buildings Transaction Business Law, the Financial Instruments and Exchange Law, or other real estate-related laws are revised, or if new legislation is implemented. Such events could adversely affect the Group's business performance.

Furthermore, if revisions to the various tax systems in Japan and overseas that impact the Real Estate Development Business are implemented, this could lead to an increase in expenses for the holding, acquisition, and sale of assets, or cause a decline in the purchasing sentiment of customers. It could also prompt a change in the facility strategies of companies and revisions of their investment plans. Such events could have an adverse impact on the Group's business performance.

(3) Risks resulting from a rise in interest rates

The balance of interest-bearing debt at March 31, 2019 was ¥914,000 million, an increase of ¥36,200 million year on year (equivalent to 51.9% of total assets, decreased by 0.5 percentage points year on year). When raising funds by borrowing, the Group attempts to deal with the risk of a short-term rise in interest rates mainly by taking out long-term, fixed-rate loans.

However, an increase in borrowing costs due to a rise in market interest rates could have a negative impact on the Group's business performance and financial condition.

(4) Risks resulting from natural disasters and sudden accidents

Natural disasters, such as earthquakes and wind and flood damage, as well as sudden accidents, could lead to damage or destruction of real estate owned or managed by the Group. Such incidents could have a negative impact on the Group's business performance and financial condition.

(5) Risks resulting from leakage of personal information and a crisis in the information management system

In the course of carrying out its operations, the various businesses of the Group handle large quantities of personal information. The Group endeavors to comply with various laws and regulations pertaining to personal information, such as the Law Concerning Protection of Personal Information, and also handle information in the proper manner. Moreover, Group companies have produced various documents, such as "Information Security Provisions," "Rules for Handling Specific Personal Information" and "Guidelines for Handling Information." In these ways, the Group strives to train and educate employees and protect the interests of customers. In the event of external leakage of personal information due to unforeseen circumstances.

However, in the event of an external leakage of personal information or a risk arising to the Company's information management system due to unforeseen circumstances including a cyberattack or illegal access to the Company's computer system, confidence in the Group could be lost, leading to such issues as a decrease in sales, the incurrence of expenses to pay compensation for damages, and delays to business activities and business processing. This could have an adverse impact on the Group's business performance.

(6) Risks related to the Real Estate Development Business

When considering purchases of land for business use, the Group conducts historical and pollution assessments in advance. If the presence of pollution is confirmed, the Group either cancels the acquisition or engages specialists to remove such pollution. However, it is possible that the aforementioned assessments fail to confirm the full extent of soil pollution. The detection of soil pollution on land purchased by the Group, therefore, could lead to changes in the Group's original business schedules or to the incurrence of additional expenses, which could have a negative impact on its business performance or financial condition.

Moreover, when carrying out design and construction, we place orders with third parties such as construction and other companies who possess certain skills in building design, construction operations, and other matters. At the Group, departments possessing specialist knowledge carry out appropriate supervision and direction at each stage of design and construction. However, in the event of defective construction work or other issues, confidence in the Group could be lost, and unexpected expenses and delays to development projects could occur. This could have an adverse impact on the Group's business performance.

Notes to Consolidated Financial Statements

Nomura Real Estate Holdings, Inc. and its subsidiaries
March 31, 2018 and 2019

1. Basis of Presentation of Consolidated Financial Statements

The accompanying consolidated financial statements of Nomura Real Estate Holdings, Inc. (the "Company") and its subsidiaries (collectively, the "Group") have been prepared in accordance with the provisions set forth in the Financial Instruments and Exchange Act of Japan and its related accounting regulations, and accounting principles generally accepted in Japan ("Japanese GAAP"), which are different in certain respects as to the application and disclosure requirements of International Financial Reporting Standards.

The accompanying consolidated financial statements have been compiled from the consolidated financial statements of the Company prepared in accordance with Japanese GAAP, and translated into English for the benefit of readers outside Japan. In addition, the notes to the consolidated financial statements include information which may not be required under Japanese GAAP but is presented herein as additional information.

The translations of the Japanese yen amounts into U.S. dollars are included solely for the convenience of readers using the prevailing exchange rate at March 31, 2019 of ¥110.99=U.S.\$1. The approximate rate of exchange prevailing at June 25, 2019 was ¥107.28=U.S.\$1. These translations should not be construed as representations that the Japanese yen amounts have been, could have been, or could in the future be, converted into U.S. dollars at this or any other rate of exchange.

2. Significant Accounting Policies

(1) Principles of Consolidation and Accounting for Investments in Affiliates

The accompanying consolidated financial statements include the accounts of the Group that the Company controls directly or indirectly. Investments in companies over which the Company exercises significant influence in terms of their operating and financial policies have been accounted for using the equity method.

All significant intercompany balances and transactions have been eliminated in consolidation. All material unrealized profit included in the assets resulting from transactions among the consolidated companies has also been eliminated.

(2) Foreign Currency Translation

All current and non-current accounts denominated in foreign currencies are translated into Japanese yen at the spot exchange rates in effect at the consolidated balance sheet date. Differences arising from such translation are recognized as gain or loss.

The asset and liability accounts of the overseas subsidiaries and affiliates are translated into Japanese yen at the exchange rates prevailing at the respective balance sheet dates of the subsidiaries and affiliates and the revenue and expense accounts are translated into Japanese yen at the average rates of exchange for the year. Differences arising from such translation are presented as "Foreign currency translation adjustments" in Net Assets.

(3) Cash and Cash Equivalents

In preparing the Consolidated Statements of Cash Flows, cash on hand, readily-available deposits and short-term, highly liquid investments with a maturity of three months or less at the time of purchase and with an insignificant risk of market value fluctuation are considered to be cash and cash equivalents.

A reconciliation between cash and deposits in the Consolidated Balance Sheet and cash and cash equivalents is presented in Note 15.

(4) Recognition of Revenues and Related Costs

The percentage-of-completion method is applied when the outcome of the construction activity during the fiscal year is deemed certain in the course of the activity (percentage of completion is calculated by dividing the related cost incurred by the estimated total cost), otherwise the completed-contract method is applied.

(5) Inventories

Inventories are mainly stated at cost, determined by the specific identification cost method (the amounts of inventories in the accompanying Consolidated Balance Sheet are computed based on the write-down method reflecting decreased profitability).

Write-downs of inventories as a result of a decrease in profitability for the years ended March 31, 2018 was ¥496 million, and recognized in operating cost. There were no write-downs of inventories during the fiscal year ended March 31, 2019.

(6) Short-term Investments and Investment Securities

Held-to-maturity debt securities are stated at amortized cost by the straight-line method.

Available-for-sale securities with market value are stated at fair market value based on market quotations at the balance sheet date.

Unrealized gains and losses are reported, net of the applicable taxes, as a separate component of Net Assets. Cost of securities sold is determined by the moving-average method. Available-for-sale securities without market value are stated at cost by the moving-average method.

(7) Property and Equipment (except for leased assets)

Depreciation of property and equipment is computed mainly by the straight-line method.

Estimated useful lives used in the computation of depreciation are generally as follows:

Buildings and structures 2 to 65 years

(8) Software (except for leased assets)

Costs of software for internal use are amortized using the straight-line method over an estimated useful life of five years.

(9) Leased Assets

Leased assets are depreciated using the straight-line method, assuming the lease period to be the useful life and the residual value to be zero.

Finance leases, other than those that transfer ownership, that started on or before March 31, 2008, are accounted for as operating leases.

(10) Amortization of Goodwill

Goodwill is amortized using the straight-line method over a period of 14 to 20 years.

(11) Allowance for Doubtful Accounts

In order to prepare for possible bad debt losses on notes and accounts receivable and loans, allowance for doubtful accounts are provided at an amount calculated on the basis of a historical bad debt ratio for a certain reference period for normal claims, plus an estimated uncollectible amount determined on the basis of individual assessments for specific claims with potential losses.

(12) Income Taxes

Current income taxes are stated at the estimated amount payable during each fiscal year for corporation, enterprise and inhabitants' taxes in the Consolidated Statement of Income.

The tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting and income tax purposes are recognized as deferred income taxes.

(13) Provision for Retirement Benefits

To calculate retirement benefit obligations, the estimated amount of retirement benefits attributable to the fiscal year is determined based on the benefit formula method.

Prior service costs are amortized as incurred by the straight-line method over 10 years, which is within the average number of remaining service years of the eligible employees.

Actuarial gains and losses are amortized in the following fiscal year in which the gain or loss is recognized by the straight-line method mainly over 10 years, which is within the average number of remaining service years of the eligible employees.

(14) Per Share Information

Basic profit attributable to owners of parent per share is computed by dividing the profit attributable to owners of parent available for distribution to shareholders of common stock by the weighted-average number of shares of common stock outstanding during each fiscal year. Diluted profit attributable to owners of parent per share is computed by dividing the profit attributable to owners of parent available for distribution to the shareholders by the weighted-average number of shares of common stock outstanding during each fiscal year assuming full conversion of convertible bonds and full execution of warrants.

Net assets per share as of March 31, 2018 and 2019 were ¥2,664.70 and ¥2,854.21 (\$25.72), respectively.

Profit attributable to owners of parent per share for the years ended March 31, 2018 and 2019 were ¥240.89 and ¥245.99 (\$2.22), respectively.

Diluted profit attributable to owners of parent per share for the years ended March 31, 2018 and 2019 were ¥239.52 and ¥244.55 (\$2.20), respectively.

(15) Land Revaluation

Under the "Law Concerning Revaluation Reserve for Land" promulgated on March 31, 1998, the Company revalued its land held for business use. The tax amount for the difference between the appraisal value and the carrying amount is accounted for as "Deferred tax liabilities for land revaluation" in Non-Current Liabilities and the difference net of such tax amount is recorded as "Revaluation reserve for land" in Net Assets.

Method of revaluation:

The value of land is determined based on a reasonable adjustment to the assessed value of the fixed assets as stipulated in Item 3, Article 2 of the "Enforcement Ordinance Concerning Land Revaluation" (Ordinance No. 119 enacted on March 31, 1998). Date of revaluation: March 31, 2002

(16) Derivative Financial Instruments

Net assets and liabilities arising from derivative financial instruments are measured at fair value, with any changes in unrealized gain or loss credited or charged to income. Hedging transactions are accounted for using deferral hedge accounting, which requires the unrealized gains or losses to be deferred as assets or liabilities until the losses or gains on the underlying hedged items are recognized.

For interest rate swaps that meet certain hedging criteria, the Group applies exceptional treatment where the Group does not record these instruments at fair value but charges or credits the net cash flows from these instruments to the interest arising from the hedged borrowings and corporate bonds. However, for currency swaps that meet certain hedging criteria, the currency swap contracts (the "Contracts") and the securities denominated in foreign currencies (the "Hedged items") are accounted for in the following manner:

(a) If the Contracts are executed to hedge an existing the Hedged items,

- (i) the difference, if any, between:
 - the Japanese yen amount of the Hedged items translated using the spot rate at the inception date of the Contracts and
 - the book value of the Hedged items is recognized in the Consolidated Statement of Income in the period which includes the inception date, and
- (ii) the discount or premium on the Contracts (that is, the difference between:
 - the Japanese yen amount of the Contracts translated using the contracted swap rate and
 - the Japanese yen amount of the Contracts translated using the spot rate at the inception date of the Contracts) is recognized over the term of the Contracts.

(b) If the Contracts are executed to hedge a future transaction denominated in a foreign currency, the swap transaction will be recorded using the contracted swap rate, and no gains or losses on the Contracts are recognized.

3. Changes in Presentation Method

Changes due to application of "partial amendments to accounting standard for tax effect accounting"

"Partial Amendments to Accounting Standard for Tax Effect Accounting" (ASBJ Statement No. 28 issued on February 16, 2018) are applied from the beginning of the fiscal year ended March 31, 2019. As a result of changes in the presentation method, deferred tax assets are classified under investments and other assets and deferred tax liabilities are classified under non-current liabilities.

As a result, in the consolidated balance sheet as of March 31, 2018, "deferred tax assets" under "current assets" decreased by ¥6,911 million, and "deferred tax assets" under "investments and other assets" increased by ¥6,318 million. Also, "deferred tax liabilities" under "current liabilities" decreased by ¥18 million, and "deferred tax liabilities" under "non-current liabilities" decreased by ¥574 million.

In addition, since deferred tax assets and deferred tax liabilities of the same taxable entity are offset and recorded at the net amount, total assets as of April 1, 2018 decreased by ¥593 million.

4. Additional Information

Performance-based stock incentive plan, etc. for directors and executive officers

The Company and certain consolidated subsidiaries have introduced a performance-based stock incentive plan (the "Plan") as an incentive plan for Directors and Executive Officers (excluding Directors serving as Audit & Supervisory Committee Members, External Directors and non-residents of Japan; "the Directors, etc.") from the fiscal year ended March 31, 2019. The Plan is a compensation scheme that functions as an incentive for improving medium- to long-term corporate value of the Company and enables interests to be shared with the Company's shareholders by linking the compensation paid to the Directors, etc. to the Company's share price. Specifically, it utilizes the mechanism of an executive compensation BIP trust. The Company's shares are acquired in advance by an executive compensation BIP trust, and the Company's shares and an amount equivalent to the proceeds of converting the Company's shares into cash are delivered and paid to the Directors, etc. according to their position, etc.

The shares of the Company remaining in the trust are recorded as treasury shares under net assets at the book value within the trust. The book value and number of such treasury shares were ¥3,782 million (\$34,084 thousand) and 1,725,000 shares, respectively, as of March 31, 2019.

Furthermore, the estimated amount of the above executive compensation at the end of the fiscal year is recorded as provision for share-based remuneration.

ESOP trust for granting stock

The Company and certain consolidated subsidiaries have introduced an "ESOP Trust for Granting Stock" (the "Plan") from the fiscal year ended March 31, 2019 as an incentive plan for employees. The Plan is a compensation scheme that encourages employees to execute their duties with an awareness of the Company's share price because employees can enjoy economic benefits from an increase in the price of the Company's shares, and is expected to have the effect of increasing the motivation of employees and enable them to share interests with the Company's shareholders. Specifically, it utilizes the mechanism of ESOP trust for granting stock. The ESOP trust acquires the Company's shares in advance, and grants them to employees who satisfy certain requirements.

Furthermore, the estimated amount of the above compensation scheme at the end of the fiscal year is recorded as provision for share-based remuneration.

5. Financial Instruments

(1) Policies on Financial Instruments

It is the policy of the Group to limit its fund management to safe and highly liquid deposits while raising funds primarily through loans from financial institutions and the issuance of corporate bonds. Derivatives are utilized for hedging against the risks described below not for speculative purposes.

(2) Details of Financial Instruments and Risks

Securities comprise safe and highly liquid negotiable deposits held for the purpose of managing temporary surplus funds.

Equity investments and investment securities primarily consist of stocks, investment units, and others held for the purpose of business promotion, all of which are exposed to market price fluctuation and issuer credit risk. Currency swaps and forward exchange contracts are used to hedge risks from exchange rate fluctuations on securities in foreign currencies. Interest rate swaps are used to hedge risks arising from fluctuations in interest rates on long-term borrowings.

Derivative transactions used by the Company are as follows:

Hedging instruments	Hedged items
Interest rate swap contracts	Borrowings
Currency swaps and foreign exchange forward contracts	Securities denominated in foreign currencies

The Group evaluates hedge effectiveness by comparing the cumulative changes in market fluctuations or in cash flows of the Hedged items to the corresponding changes in the hedging derivative instruments. However, the Group does not evaluate hedge effectiveness of interest rate swaps for which the Group applies the exceptional treatment.

(3) Policies and Systems for Risk Management

The Company regularly checks the market value of equity investments and investment securities, as well as the financial conditions of their issuers.

The Finance Department conducts execution of derivative transactions and risk management based on the risk management policies and operational plan determined by the Director in charge of Finance. The Finance Department also reports the status of transactions and risk information to the Director on a regular basis. The consolidated subsidiaries conduct execution of derivative transactions and risk management in accordance with internal policies. The Company considers there is no substantial credit risk associated with these transactions because of the transactions being conducted only with highly creditworthy financial institutions.

Based on the reports from consolidated subsidiaries and all departments within the Group, the Finance Department of the Company creates and updates cash flow plans in a timely manner, managing liquidity risk through such methods as ensuring that a specific amount of on-hand liquidity is always available.

(4) Supplemental Information on Fair Values

The fair values of financial instruments are based on their market prices. The fair values of financial instruments with no available market prices are determined by using prices calculated in a reasonable manner. However, as various factors are incorporated into these calculations, the resulting values may vary if different assumptions are provided. The contract amount shown in Note 16. Derivative Financial Instruments does not represent the market risk regarding the derivative transactions.

(5) Fair Values of Financial Instruments

The book values, fair values and differences of financial instruments as of March 31, 2018 and 2019 are as follows. Items for which fair value is extremely difficult to determine have not been included.

Notes:

1. Investments in non-consolidated subsidiaries and affiliates are as follows:

Investment securities (stocks, etc.)

¥5,538 million as of March 31, 2018

¥10,060 million (\$90,644 thousand) as of March 31, 2019

2. Method of measuring the fair value of financial instruments

Assets

(1) Cash and deposits

As these instruments are settled within a short term and their book values approximate fair values, their book values are deemed as their fair values.

(2) Securities

As these instruments, primarily comprising negotiable deposits, are settled within a short term and their book values approximate fair values, their book values are deemed as their fair values.

(3) Investment securities

For stocks and investment units, fair values are determined mainly at the price quoted on an exchange. For investment trusts, fair values are determined at an amount reasonably calculated based on a reasonable estimate of the management. Please see Note 6. Securities for information on those securities in (2) and (3).

Liabilities

(1) Short-term loans payable

As these instruments are settled within a short term and their book values approximate fair values, their book values are deemed as their fair values.

(2) Bonds payable

Principally, bonds issued by the Company, the fair value of which is decided by market prices.

(3) Long-term loans payable

For long-term loans payable, fair value is determined by discounting the total amount of principal and interest at the assumed interest rate on new loans of the same type. Long-term loans with floating interest rates are hedged by interest rate swaps subject to the exceptional treatment, and, therefore, the fair value is determined by discounting the total amount of interest and principal together with cash flow generated by the interest rate swap at the interest rate assumed in a reasonable manner for new loans of the same type.

12. Impairment Loss

The Group recognized impairment loss on the following groups of assets for the fiscal years ended March 31, 2018 and 2019:

2018	Primary use	Type	Location
Leased assets (3 locations in total)		Buildings	Yokohama-shi, Kanagawa and other locations

Assets of the Group are grouped into the smallest unit that generates cash flows that are largely independent of cash flows from other assets or groups of assets. The headquarters building and certain other assets are considered to be shared assets.

As a result, with respect to three groups of assets etc., comprising those whose profitability has dropped significantly due mainly to the changes of usage, decline in rent level or the deterioration of the market conditions, the carrying amount has been reduced to the recoverable amount and the amount of reduction has been recognized in extraordinary losses as impairment loss of ¥3,614 million for the fiscal year ended March 31, 2018. The impairment loss consists of ¥3,614 million of buildings.

The recoverable amount of these groups of assets is measured at the net realizable value and the net realizable value is determined based on the appraisal value provided by real estate appraisers.

2019	Primary use	Type	Location
Leased assets (2 locations in total)		Land Buildings	Chiyoda-ku, Tokyo and other locations

Assets of the Group are grouped into the smallest unit that generates cash flows that are largely independent of cash flows from other assets or groups of assets. The headquarters building and certain other assets are considered to be shared assets.

As a result, with respect to two groups of assets etc. to be sold, the carrying amount has been reduced to the recoverable amount and the amount of reduction has been recognized in extraordinary losses as impairment loss of ¥1,989 million for the fiscal year ended March 31, 2019. The impairment loss consists of ¥1,580 million of land and ¥408 million of buildings.

The recoverable amount of these groups of assets is measured at the net realizable value and the net realizable value is determined based on the appraisal value provided by real estate appraisers.

13. Income Taxes

The statutory tax rates in Japan for the Company and its domestic subsidiaries were 30.9% for the fiscal year ended March 31, 2018 and 30.6% for the fiscal year ended March 31, 2019.

Significant differences between the statutory tax rate and the effective tax rate

Fiscal year ended March 31, 2018

The note has been omitted because the difference between the statutory tax rate and the effective tax rate is less than 5% of the statutory tax rate.

Fiscal year ended March 31, 2019

Statutory tax rate (adjustment)	30.6%
Entertainment and other expenses that are permanently nondeductible	0.9%
Tax effect related to investments in subsidiaries	(3.2)%
Others	0.5%

14. Shareholders' Equity

Under the Companies Act of Japan (the "Act"), all funds obtained through the issuance of common stock must be treated as capital stock and, by resolution of the board of directors, an amount equivalent to less than half of those funds may be appropriated to the capital reserve (a component of capital surplus).

The Act provides that an amount equal to 10% of the amount to be distributed as distributions of capital surplus (other than the capital reserve) and retained earnings (other than the legal reserve) be transferred to the capital reserve and the legal reserve, respectively, until the sum of the capital reserve and the legal reserve equals 25% of the capital stock account.

As of March 31, 2019, the Group's capital reserve amounted to ¥110,316 million (\$1,038,369 thousand), and no legal reserve was recorded.

18. Real Estate for Rent

Some of the Company's consolidated subsidiaries own rental office buildings and rental facilities (including land) in Tokyo and other regions.

Some rental office buildings are regarded as properties including the portion used as rental properties since they are used by the Company and certain consolidated subsidiaries.

The book values in the Consolidated Balance Sheet, changes during the fiscal years ended March 31, 2018 and 2019, and fair values of real estate, of which some portions are used as rental property, are as follows:

(1) Changes in Fair Value of Rental and Other Properties during the Fiscal Years Ended March 31, 2018 and 2019

	Book value ¹		Fair value ²	
	Increase/Decrease		March 31, 2018

			¥878,919	\$7,918,905
			26,125	235,387
			56,820	511,938

Notes: 1. Book values in the Consolidated Balance Sheets are the amounts determined by deducting accumulated depreciation from the acquisition cost.
2. Fair values as of March 31, 2018 and 2019 are determined by the Group (including adjustments based on certain indexes) based primarily on their values according to real estate appraisal standards. However, if there have been no fluctuations in appraisal values or indexes considered to appropriately reflect market values, the Group uses the appraisal values or amounts derived from the indexes of the recent appraisal or acquisition from third parties as the fair values at March 31, 2018 and 2019.

(2) Operating Profit and Other Information on Rental Properties in the Fiscal Years Ended March 31, 2018 and 2019

Notes: 1. As real estate of which some portions are used as rental property includes portions used by the Company and certain consolidated subsidiaries for providing services as well as management and administration, operating income for this type of real estate is not recorded.
2. Others include gain on sales of non-current assets (¥3,311 million) and loss on building reconstruction (¥3,614 million) in the fiscal year ended March 31, 2018, and impairment loss (¥38 million (\$346 thousand)) in the fiscal year ended March 31, 2019.

19. Segment Information

(1) Segment Summary

The reportable segments of the Group comprise of those business units for which separate financial information is available, and which are subject to a regular review conducted by the Company's Board of Directors in order to determine the allocation of management resources and evaluate their performance.

With the Company being a pure holding company, the Group consists of business companies such as Nomura Real Estate Development Co., Ltd. The business companies (or business divisions in the case of Nomura Real Estate Development) formulate comprehensive strategies on respective products and services handled by them and conduct business activities based on such strategies.

Therefore, business segments of the Group are distinguished by products and services, primarily by business companies (or by business divisions in the case of Nomura Real Estate Development).

(2) Methods for Calculating Net Sales, Income (loss), Assets, Liabilities and Other Items by Reportable Segment

The accounting method for reportable segments is almost equivalent to that specified in "Significant Accounting Policies."

Reportable segment income is presented based on operating income. Intersegment sales and transfer amounts are presented based on market prices.

Results by segment for the fiscal years ended March 31, 2018 and 2019 were as follows:

5. Method for estimating per share fair value of stock options

The per share fair value of the stock options granted during the fiscal year ended March 31, 2019 (FY2018) was estimated as follows:

- (1) Valuation technique used: Black-Scholes method
- (2) Main base data and estimation methods

Nomura Real Estate Holdings, Inc.

	Nomura Real Estate Holdings, Inc. 1st issue of FY2018 stock options	Nomura Real Estate Holdings, Inc. 2nd issue of FY2018 stock options
Expected volatility of the share price (Note 1)	32.58%	32.58%
Expected remaining life of the option (Note 2)	5.5years	5.5years
Expected dividend (Note 3)	¥75 (\$0.68) per share	¥75 (\$0.68) per share
Risk-free interest rate (Note 4)	0.00%	0.00%

- Notes: 1. Calculated based on the actual stock price for five years and six months (from January 2013 to July 2018).
2. Calculated with an assumption that the stock option is exercised at the middle of the exercise period as the Company does not have sufficient data for a more precise estimation.
3. Based on the expected dividend for the fiscal year ended March 31, 2019 at the grant date.
4. Based on the yield of Japanese government bonds for the period equivalent to the expected remaining life of the option.

6. Estimation of the number of vested options

The estimation of the number of vested options is made based on the actual number of forfeited options due to difficulty in reasonably estimating future forfeitures.

Independent Auditor's Report

The Board of Directors
Nomura Real Estate Holdings, Inc.

We have audited the accompanying consolidated financial statements of Nomura Real Estate Holdings, Inc. and its consolidated subsidiaries, which comprise the consolidated balance sheet as at March 31, 2019, and the consolidated statements of income, comprehensive income, changes in net assets, and cash flows for the year then ended and a summary of significant accounting policies and other explanatory information, all expressed in Japanese yen.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in Japan, and for designing and operating such internal control as management determines is necessary to enable the preparation and fair presentation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. The purpose of an audit of the consolidated financial statements is not to express an opinion on the effectiveness of the entity's internal control, but in making these risk assessments the auditor considers internal controls relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Nomura Real Estate Holdings, Inc. and its consolidated subsidiaries as at March 31, 2019, and their consolidated financial performance and cash flows for the year then ended in conformity with accounting principles generally accepted in Japan.

Convenience Translation

We have reviewed the translation of these consolidated financial statements into U.S. dollars, presented for the convenience of readers, and, in our opinion, the accompanying consolidated financial statements have been properly translated on the basis described in Note 1.
